Experience

Amplify Education / Product Design Director

2018 – PRESENT

Promotions: Product Design Manager (2022–2023), Senior Product Designer (2019–2022), UX Designer (2018–2019)

Directed a design team that owns 15+ complex student data products; collaborated with execs and cross-functional leaders to influence roadmaps and future initiatives.

Established accessible data visualization and color guidelines; this system is adopted company-wide for reporting products.

Defined the strategic vision and led a large-scale reporting migration to unify all reports under a single platform.

Launched a new literacy assessment platform as the solo designer from 0 → 1.

Created online reading assessments and the first iteration of a teaching portal as a response to COVID-19 remote learning.

Established a design system model for org-wide collaboration between cross-vertical teams, designers, and engineers by having my team build reusable components in the design library.

Northwestern Polytechnic University / Front-end Developer

2016–2017

Designed and shipped front-end production code for 2 university websites and the internal administration portal.

Mobile Action / Front-end Web Developer

(Contract) 2015

Shipped front-end production code for data analytic dashboard to track and optimize app performance.

Achievers / Front-end Web Developer

(Contract) 2015

Built a survey app to collect data at large marketing events. Rebuilt an accessible and mobile-friendly corporate website.
